

DNAnet[®] Home Asset and Valuable Marking Kit

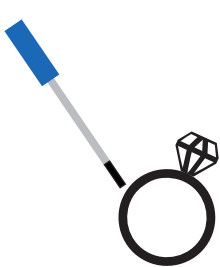

Recognizing that DNA-based evidence is the cornerstone of modern-era law enforcement, Applied DNA Sciences has developed the ultimate asset and valuable marking tool.

DNAnet[®] helps to expand and strengthen any community security effort by providing a means of directly linking valuables and criminals to crimes. Valuables and assets are tagged with an indelible, fluorescing DNA-marked liquid.

The **DNAnet** mark facilitates the rapid return of lost or stolen goods to their owner. As a crime is investigated, detection of a fluorescing **DNAnet** mark indicates that an item is registered. This assists police in linking offenders and stolen items to a specific crime scene, creating a greater ability to identify and convict.

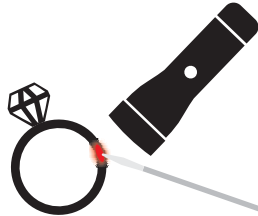

valuable protection | crime deterrence | recovery and return of property

Valuables Marked by homeowner

Property Loss Occurs

Police Screen Recovered Goods with UV light - sample glowing spots for DNA analysis

DNA Analysis identifies item owner, links offender to crime scene

Item Returned to owner

Criminal Convicted

FM-100-001

Kit Contents
