

DNAet[®] Forensic Marking and Recovery Kit

DNAet[®] Permanent and Transferable forensic marking and recovery (sting) kits from Applied DNA Sciences provide law enforcement, security organizations and citizens with a new, powerful means of establishing compelling evidence. This new tactical tool forensically links criminals and stolen goods to specific crimes using DNA technology. Proven DNA-based evidence gathered during criminal investigations strengthens any case. DNAet enables investigators to mark, link and convict offenders.

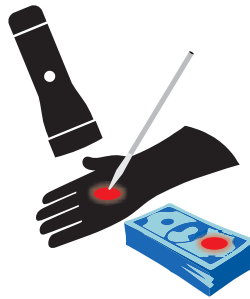

Elevating investigative efforts to new levels of effectiveness.

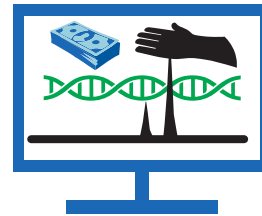

Sting Evidence marked by police

Marked Evidence handled by offender

Police Screen Suspects and Evidence with UV light - sample glowing spots for DNA analysis

DNA Analysis links offender and evidence to crime scene

Conviction!

Kit Details:

- Mark and sample up to 3 pieces of evidence (e.g., currency, narcotics, etc.) per kit.
- DNA analysis and expert witness report included.
- Forensic expert witness testimony is available.
- Permanent or Transferable formats available depending on nature of sting operation.

Quick Trace in the Field - under UV light, the DNAet mark emits a bright red signal, making it easy to identify on the spot.
