

A New Era of High-Technology Crime Prevention

Recognizing that DNA-based evidence is the cornerstone of modern-era law enforcement, Applied DNA Sciences offers enhanced crime-fighting tools that repel the initial threat while marking offenders with a forensic tag that definitively links them to the crime scene. Increased conviction numbers and a heightened level of deterrence result from a DNA-fortified approach to crime prevention.

SmokeCloak® DNA security fog

When deployed in pharmacies, banks, commercial/retail locations, SmokeCloak® DNA helps protect staff, customers and assets. A thick and disorienting fog wards off offenders and deposits a unique, location-specific DNA marker on skin, clothing and stolen items. The combination of fog and DNA technologies strikes fear into criminal hearts; deterrence levels soar.

Repel. Mark. Deter.

WARNING
DNA-fortified Marking System Installed
OFFENDERS WILL BE CONVICTED

All SmokeCloak Vali products are fully compatible and can be integrated into any alarm system.

About Applied DNA Sciences

Using biotechnology as a forensic foundation, Applied DNA Sciences creates unique security solutions to combat crime, counterfeiting and other challenges of modern commerce.

- UK-based Cash-and-Valuables-in-Transit firms using DNA marking reported a 55% reduction in the number of cash box attacks, and a 72% reduction in cash losses.
- DNA markers have been adopted by Sweden's largest electricity provider to protect power station copper assets. An 85% year-over-year theft reduction has been realized.

About SmokeCloak and Smoke Solutions

Smoke Solutions (Smoke & Screen Security Systems) is a smoke security and ventilation company that develops sophisticated instant protection systems and has been involved with SmokeCloak for 18 years. SmokeCloak is the market leader in fog solution technology. Whether you're concerned about reducing losses in the initial minutes of a break-in or reducing personal risk at fire training sessions our fog solutions provide instant safety. Our harmless dry vapor has no negative side effects, and can now be DNA-fortified to add an entire new dimension to crime prevention and property loss control.

sentry  **DNA**

Sentry DNA intruder tagging systems

Sentry intruder tagging systems are deployed in retail locations, banks, pharmacies, commercial facilities – any place where the goal is to protect against theft or vandalism. If a crime is committed, the Sentry DNA spray unit is activated. When the intruder passes near the activated device, a fine mist transfers a DNA marker. As a crime is investigated, the DNA marker can assist police in linking the offender and stolen items to a specific crime scene, creating a greater ability to identify and convict.

Mark. Convict. Deter.
